

Oxygen Mono (OxygenMono-Regular.ttf dated 2023-05-23)

This Monospace font covers some European languages using the latin alphabet. For Serbo-Croat it does not include the threoretically-encountered digraphs. Although it has the legacy l-with-middle-dot for the Catalan l·l that first lowercase l lacks its middle dot giving ll but the uppercase LL is good. For Romanian this font lacks T (and t) with cedilla and therefore cannot be used.

For variations of the Latin alphabets I attempt to show the whole alphabet, followed by Article 1 of the UDHR (it is traditional!). For other scripts and languages I merely display the digits (if not common 0..9) and Article 1.

This document was prepared using X<sub>Y</sub>TEX and fontspec. Depending on the font, missing glyphs will be replaced either by nothing at all (occasional fonts do that), a blank space, an empty box, or some other symbol indicating a missing glyph.

This monospaced text might also include added spacing to justify the lines.

This font has only a normal style with a regular weight.

## 2 Quotation-marks, etc.

In real-world usage, particularly when looking at news sites, the presence or absence of the correct quote characters will make a difference. As a coder, I use '...' or "...". but in good text there are variations and this font supports:

left and right single quotes '...'	with right single quote '...'
	double low 9,
left and right double quotes "..."	and left double quotes „...“
	guillemets «...»
single turned comma,	angle quotes <...>

In Spanish languages, the inverted exclamation-mark ¡ and inverted question-mark ¿ are necessary.
