

AR PL New Sung (from odosung.ttc from opendesktop-fonts-1.4.2)

This Song font (Chinese Serif) supports English, and Simplified Chinese. The Cyrillic glyphs are too widely-spaced and the Greek glyphs are similarly spaced, oblique, and omit iota with diaeresis.

The TTC should not be installed at the same time as the old fireflysung because the names known to fontconfig for fireflysung and the non-monospace font are identical.

For languages not using the Latin, Cyrillic, or monotonic Greek alphabets I merely display the digits if not common 0..9, and Article 1 of the UDHR (that is traditional!).

This document was prepared using Xe_{La}T_EX and fontspec. Missing glyphs will be replaced by a blank space.

This monospaced text might also include added spacing to justify the lines, although maybe only noticeable in the English text.

This font only has a normal style in a regular weight. It lacks the OpenType tag 'hani' needed to use polyglossia for CJK scripts.

1 CJK scripts

1.1 Simplified Chinese

人人生而自由,在尊严和权利上一律平等。他们赋有理性和良心,并应以兄弟关系的精神相对待。

2 Quotation-marks, etc.

In real-world usage, particularly when looking at news sites, the presence or absence of the correct quote characters will make a difference. As a coder, I use '...' or "...". but in good text there are variations and this font supports:

left and right single quotes	‘...’	guillemets	«...»
	‘...’	angle quotes	<...>
left and right double quotes	“...”	angle brackets	<...>
	“...”	double angle brackets	«...»
single turned comma,	‘...’	corner brackets	「...」
with right single quote	‘...’	white corner brackets	『...』

In Spanish languages, the inverted exclamation-mark ¡ and inverted question-mark ¿ are necessary.
