

**Noto Sans Mono CJK JP** (NotoSansMomoCJKjp-Regular.otf dated 2021-04-20)

This Monospace CJK Sans / Gothic font is intended for use with Japanese but also covers some other languages. For Chinese some shapes might look wrong.

For variations of the Latin and Cyrillic alphabets I attempt to show the whole alphabet, followed by Article 1 of the UDHR (it is traditional!). For other scripts and languages I merely display the digits (if not common 0..9) and Article 1.

This document was prepared using Xe<sub>La</sub>T<sub>E</sub>X and fontspec. Missing glyphs will be replaced by an X in a box.

This monospaced text might also include added spacing to justify the lines.

This font has regular and bold weights but lacks an italic face.

For the Latin and Cyrillic alphabets it uses normal-width characters, but the Latin alphabet only properly covers the Latin-1 languages and Vietnamese and the Cyrillic alphabet only covers Russian. The Greek alphabet does not include any letters with dialytika, and has badly-offset tonos.

This font seems to support Korean Hanja which can still be used in personal names and in signs for place names (i.e. it covered all the examples I could find), but some of the glyph shapes will look wrong to a Korean.

The mid-line horizontal ellipsis (U+22EF) is positioned on the baseline instead of mid-level. That is technically wrong.

人人生而自由，在尊严和权利上一律平等。他们赋有理性和良心，并应以兄弟关系的精神互相对待。

## 5 Quotation-marks, etc.

In real-world usage, particularly when looking at news sites, the presence or absence of the correct quote characters will make a difference. As a coder, I use ‘...’ or ”...” but in good text there are variations and this font supports:

left and right single quotes ‘...’    angle brackets <...>  
left and right double quotes “...”    double angle brackets «...»  
single turned comma,                    corner brackets 「...」  
with right single quote ‘...’        white corner brackets 『...』  
double low 9 and left double quotes  
”...“  
guillemets «...»  
angle quotes <...>

In Spanish languages, the inverted exclamation-mark ¡ and inverted question-mark ¿ are necessary.

## 6 Symbols
